Cost of university set to skyrocket regardless of fee deregulation outcome

A child born today could pay more than half a million dollars for their total university education, according to the ASG Planning for University Index released today.

The total cost of a university education in 2033 is forecast to increase by approximately \$260,000 from 2015 figures for a medical student living away from home, when variables such as university fees, transport, computers and living costs are taken into account.

For students living at home, living costs are projected to be significantly less. A medical student living in the family home in 2033 is projected to pay almost half (\$267,875) what their peers living in shared rental accommodation will pay over the course of their six year degree (\$508,546).

The cost of education is still high for relatively cheaper courses, with a photography student living at home in 2033 projected to pay \$93,044 over their three year degree, \$40,109 more than a student living at home in 2015. A photography student living in shared rental accommodation in 2033 is projected to pay more than double (\$204,431) what their classmates living at home will pay.

ASG Chief Executive Officer John Velegrinis says that now more than ever, external factors need to be considered when planning for university.

"The current uncertainty around fee deregulation makes planning for the cost of education difficult. What we do know for certain is that living costs and degrees will be more expensive in the future.

"Over the last five years in Australia the cost of tertiary education has risen by more than double the rate of inflation. We can expect this trend to continue, especially if fees are deregulated.

"While some students are able to save on costs by living at home, this is not an option for everyone. For students in regional Australia or those looking to travel interstate for further study, the financial impact is higher as they have to factor in the costs of accommodation as well as increased university fees," said Mr Velegrinis.

The index found regardless of what students are studying, they need to be able to cover the estimated costs of textbooks, printing and stationary (\$1006), student fees (\$286) and computer/internet access (\$554) whether living at home or in shared rental accommodation.

Jemima Jabez lives with her parents and is in her first year of Advanced Medical Science at the University of Western Sydney.

"I prefer to live at home, especially with uni being a new environment. There's a lot of pressure getting used to new study habits and making new friends, and it also helps me save as I don't have to pay for rent or groceries.

"One of my friends now lives in Hawkesbury because her course wasn't offered locally. She's paying about \$180 a week just for rent and she's really missing home," said Ms Jabez.

[ASG's HELP debt calculator](#) allows students and parents to model what the total cost of university education could be. By factoring in the cost of interest associated with any debt that is taken on as a result of study, students and parents are given a true and holistic picture of the cost of university.

- ENDS-

Summary of estimated costs for a student starting university in 2015/2033

Course	Total Course Costs Only		Total Course and Living Costs in Shared Accommodation		Total Course and Living Costs in Family Home	
	2015	2033	2015	2033	2015	2033
Photography (3 years)	\$19,448	\$49,120	\$103,242	\$204,431	\$52,935	\$93,044
Psychology (4 years)	\$26,627	\$67,252	\$140,037	\$278,670	\$71,565	\$126,341
Horticulture (3 years)	\$27,718	\$70,006	\$111,512	\$225,317	\$61,205	\$113,930
Accounting (3 years)	\$32,453	\$81,967	\$116,247	\$237,278	\$65,940	\$125,891
Engineering (4 years)	\$37,950	\$95,849	\$151,360	\$307,267	\$82,888	\$154,938
Law (4 years)	\$44,433	\$112,225	\$157,843	\$323,643	\$89,371	\$171,314
Veterinary Science (5 years)	\$57,046	\$144,081	\$200,986	\$413,989	\$113,588	\$218,610
Medicine (6 years)	\$70,325	\$177,620	\$245,753	\$508,546	\$138,631	\$267,875

Editor's notes

The Australian Scholarships Group (ASG) is a member owned organisation, helping to create educational opportunities for children. ASG has been helping families and their children for more than 40 years. During this time, more than 515,000 children have been enrolled with ASG and more than \$2 billion in education benefits and scholarship payments returned to members.
